

From a merging of Portersville Valve and PRD Technologies in 2013 came Portersville PRD, the leading provider of industrial valve & pressure relief devices, integrated solutions & services. Portersville PRD assures you the lowest cost of ownership through industry-leading products and availability, faster turnaround for scheduled maintenance, planned outages and emergency services.

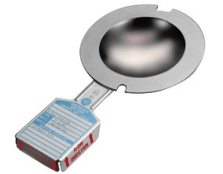

Farris Engineering

Farris Engineering has designed a wide range of safety relief valves for the specific needs of all industries. A complete offering of spring-loaded and pilot-operated relief valves provide safe and positive protection against overpressure situations. Farris provides products and engineering services to the hydrocarbon processing, oil & gas, petrochemical, pharmaceutical and general processing industries. Farris FAST network provides finished products and parts where and when you need them.

Continental Disc Corporation

Continental Disc Corporation manufactures rupture discs to our customers specifications to help protect vessels, equipment and systems against damaging overpressure situations. CDC manufactures rupture disc in sizes ranging from 1/2" to 36" in styles from tension type to reverse-acting in virtually any pressure range and offers a vast material selection to meet any customers specification.

ValvTechnologies

ValvTechnologies is the leading manufacturer of zero-leakage, severe service isolation valve solutions. ValvTechnologies provides an unsurpassed level of reliability to customers in the power, oil & gas, mining, hydrocarbon, pulp & paper and various specialty industries.

Groth Tank Vents

Manufacturers of low-pressure industrial pressure / vacuum relief valves, pilot-operated relief valves, tank-blanketing gas regulators & flame arrestors for the oil & gas, liquid storage, wastewater & chemical storage facilities. Groth products are designed to protect tanks from over-pressure & under-pressure situations, protection against fire hazards & minimizing overall emissions.

Dyna-Flo

Dyna-Flo Control Valve Services is a North American manufacturer of control valve assemblies, actuation & instrumentation. Offering sliding-stem and rotary valves for any demanding process application requiring precise control & superior performance. Dyna-Flo's complete line of pressure & level controllers & digital valve positioners compliment the valve control package to provide quality product with outstanding performance.

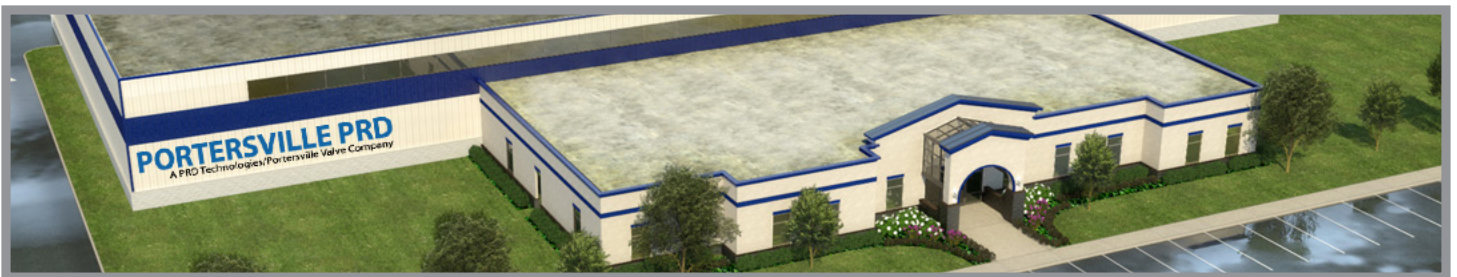

Flowserve Edward

In critical service conditions, Edward valves reliably meet or exceed customer expectations. That is how Edward forged & cast steel valves have become the preferred choice for power plants, process facilities & other critical services.

PORTERSVILLE PRD

A PRD Technologies/Portersville Valve company

About Portersville PRD

A merging of Portersville Valve and PRD Technologies in 2013, Portersville PRD is the leading provider of industrial valve and pressure relief devices, integrated solutions & services. With facilities in Portersville Pennsylvania, Tallmadge and South Point Ohio, Portersville PRD assures you the lowest cost of ownership through industry-leading products and availability, faster turnaround for scheduled maintenance, planned outages and emergency services.
